

On, page 1, line 6, after “No.”, insert, --09/781,365--.

On, page 1, line 6, replace, “SYSTEM AND METHOD” with --PROCESS--.

On, page 1, line 11, after “No.”, insert, --09/781,368--.

On, page 1, line 16, after “No.”, insert, --09/781,361--.

On, page 1, line 19, after “No.”, insert, --09/781,362--.

On, page 1, line 23, after “No.”, insert --09/766,456--.

On, page 1, lines 25-26, replace, “January 19, 2001” with --February 2, 2000--.

REMARKS

The amendment to the specification presented herein revises the specification at page 1, lines 25-26, by replacing “January 19, 2001” with --February 2, 2000--. Please note the specification as originally filed contained the correct application title and application serial number. Consequently, the error in the filing date is obvious, since one of skill in the art can readily detect the error by referring to the U.S. Patent Application entitled, “Scanning Invention Process”, serial number 60/179,675.

The amendment to the specification presented herein also revises the specification at page 1, line 6, by replacing “SYSTEM AND METHOD” with --PROCESS--. Please note the specification as originally filed contained the filing date and attorney docket number. Consequently, the error in the title is obvious, since one of skill in the art can readily detect the error by referring to attorney docket number ipCG-507, filed February 12, 2001.

The amendment to the specification presented herein also revises the specification at page 1, line 6, again at page 1, line 11, again at page 1, line 16, again at page 1, line 19, and again at page 1, line 23 by inserting the appropriate Application serial numbers. The United States Patent and Trademark Office had not assigned these serial numbers at the time of filing. Consequently, these insertions are obvious, since one of skill in the art can readily obtain the Application serial numbers by referring to the appropriate identifying filing dates and attorney docket numbers.
